

Hernán Sartorio

I design and develop web applications across the full stack.

hi@hernansartorio.com hernansartorio.com

Experience

Bloggi

Founded Aug 2019–Present [bloggi.co](#)

A simple blogging platform. Designed, developed, and launched in two months.

Theorem

Front-end engineer Oct 2015–May 2019 [theorem.co](#)

Worked remotely as a front-end engineer (with occasional contributions on design issues as well as on back-end development) on various projects. Some milestones included:

- Built a prototype of an internal application for Apple in a week. Later kickstarted the front-end of the real application.
- Helped maintain and develop the front-end of an e-commerce platform for AT&T.

UruguayPass

Co-founded 2014 [uruguaypass.uy](#)

A membership program for people and companies to access discounts in restaurants, hotels, and other businesses in Uruguay.

I was responsible for product design and full-stack development.

Uruguay360

Co-founded 2010 [uruguay360.com.uy](#)

Uruguay's first 360° virtual tours platform. I was responsible for design and technology development. Some initiatives included:

- (2013) Designed and developed a hotel booking system to offer instant hotel bookings directly on the website.
- (2012) Designed and developed a tagging system for gigapixel panoramic photos of events. Over 170k people have been tagged in all panoramas combined. Got us featured on CNN.

Web designer

Freelance 2006–2010

Occasionally designed and developed websites for local businesses as a teenager.

Education

Bachelor of Computer Science

Universidad ORT Uruguay 2009–2011

Graphic design course

2006

Web design course

2005

Open-source projects

React Nice Dates

Jan 2020 [reactnicedates.hernansartorio.com](#)

A responsive, touch-friendly, and modular date picker library for React.

jQuery Nice Select

Sep 2015 [hernansartorio.com/jquery-nice-select](#)

A lightweight jQuery plugin that replaces native select elements with customizable dropdowns.

Defunct side projects

Bookup

2014/2018–2019

[getbookup.com](#) [demo.getbookup.com](#)

Booking engine for hotels.

Propit

2013 [propitapp.com](#)

Website builder for realtors.

Pie

2012 [dowithpie.herokuapp.com](#)

To-do list application that I built as an exercise to learn Ruby on Rails.
